

CONSULT OUR SOURCE™

IT / Cyber Security Consulting

BEST IN CLASS & WE'RE FAST

Evolving People, Process, & Technology

We are an agile IT / Cyber Security consulting firm that helps clients, who seek to improve the quality of service they deliver to their customers, and optimize their end to end business processes.

Audit - Standardize - Optimize - Automate

We use industry *standardized* methodologies to perform assessments to capture precise data. We then develop standard metrics and use them to build a roadmap to move the organization towards a more *optimizing* state. Finally, we *automate*; creating efficiency and a culture that promotes a productive work environment, leading to improved profitability and operational excellence.

CORE COMPETENCIES

Our consultants are experts at helping and guiding you to establish, develop, and implement the right mix of solutions. This is done by analyzing designing and implementing solutions in the areas of:

- **ITIL** (Information Technology Infrastructure Library)
- **NIST** (National Institute of Standards and Technology)
- **DFARS** (Defense Federal Acquisition Regulation Supplement)
- **TOGAF** (The Open Group Architecture Framework)
- **Executive Management Consulting** Services
- **Project Management** (PMO)
- **Assessors / Auditors** for ITIL, NIST, ISO, HIPPA

OUR CERTIFICATIONS

- NMSDC (National Minority Supplier Development Council - Western Region - MBE)
- NGLCC (National Gay & Lesbian Chamber of Commerce)
- SBA (Small Business Administration)

CASE STUDIES

VMWARE

Our audit allowed VMware to become **NIST 800-171** compliant and enabled them to bid on **\$8 Billion of Department of Defense contracts**

Our automated process for performing assessments **saves them 66% of time and resources**, accurately tracks progress and proves compliance

Existing reporting process, often inaccurate and out-of-date; typically took 1 month. Our new Automated Project Management Dashboard, developed using existing tools, now takes 3 hours to update. **188% improvement in time and resources, reducing costs**

HITACHI DATA SYSTEMS

Transitioning from Electronic Data Systems to in-house support resulted in significant critical service failures. We helped Hitachi Data Systems develop standardized processes and rolled these out across multiple regions, resulting in an **increase of system availability from 89.5% to 99.9%**

SANDIA NATIONAL LABORATORIES

Our audit gave Sandia a baseline of their progress, a gap analysis, and a prioritized plan of action. We then engaged this complex organization with multiple teams to help them develop their key processes. **This allowed them to mature their organization by 30%** and focus on the **quality of service** to their customers
